Professional Summary

Motivated Computer Science Engineering student (Graduating 2026) with hands-on experience in Python, backend development, REST APIs, and AI-powered applications. Skilled in developing scalable web applications, real-time monitoring systems, and database-driven solutions using Python, Django, Node.js, PostgreSQL, and MongoDB. Strong foundation in software engineering, debugging, problem-solving, and Agile development practices. Passionate about backend engineering, AI technologies, and building reliable real-world applications.

Education

B.Tech in Computer Science Engineering, Sanskrithi School of Engineering, Puttaparthi 2022 – 2026
CGPA: 7.52 / 10

Intermediate (MPC), Board of Intermediate Education, Andhra Pradesh 2020 – 2022
Percentage: 84.9%

Technical Skills

Programming: Python, JavaScript, SQL, Core Java Basics

Backend Development: Django, Node.js, Express.js, REST APIs, API Integration

Frontend Development: React.js, HTML, CSS

Databases: PostgreSQL, MongoDB, MySQL

AI & Automation: YOLOv8, OpenCV, OCR Workflows, AI-assisted Development

Concepts: Data Structures, OOP, DBMS, SDLC, Agile Scrum, Debugging

Tools/Cloud: Git, GitHub, Postman, Docker Basics, AWS Fundamentals, Linux Basics

Internship Experience

Full Stack Developer Intern, SmartInternz Dec 2025 – Mar 2026

- Developed scalable backend services and REST APIs using Node.js and Express.js.
- Optimized SQL queries and backend workflows for efficient application performance.
- Debugged application and API issues to improve backend reliability and response handling.
- Collaborated in Agile teams using Git/GitHub for version control workflows.
- Performed API testing using Postman to ensure performance and functionality.

Projects

SmartSlot – AI-Powered Real-Time Monitoring & Analytics Platform

GitHub Repository — Live Demo

- Developed a real-time monitoring and analytics platform using Python, Django, PostgreSQL, YOLOv8, and OpenCV.
- Built REST APIs and optimized PostgreSQL queries for high-volume real-time data processing.
- Implemented AI-driven object detection and OCR workflows for automated monitoring systems.
- Improved backend performance and system reliability through debugging and optimization.

MediConnect – Full Stack Healthcare Management Platform

GitHub Repository — Live Demo

- Built a secure healthcare platform using React.js, Node.js, Express.js, and MongoDB.
- Developed RESTful APIs for appointment scheduling and backend workflow automation.
- Implemented JWT authentication and role-based access control mechanisms.
- Improved application responsiveness through backend optimization and debugging techniques.

Certifications

- Programming for Everybody (Python) – Coursera
- AI Deployment & Automation – EduSkills
- Full Stack Development (MERN) – SmartBridge / APSCHE

Languages

Telugu (Native), English (Professional), Hindi (Basic)
